- f. Two close-support squadrons; and
- g. Fighter squadron.
5. The aviation park has YAK-9 and IL-10 planes. The strength of the regiment is 650 men. There is one maintenance battalion consisting of four companies. The guard company is equipped with three 12.7 mm. antiaircraft machine guns.
 6. A branch of TAROM, Rumanian civilian airline, carries on civilian traffic with IL-12/a, 27-passenger planes, and YAK-16, 10-passenger planes. The TAROM traffic office is located 350 meters north of the west corner of the airfield. This office also has a garage for busses. There are two concrete sheds west of the TAROM traffic building, each 16 by 8 meters in dimension. The north shed contains gasoline drums for TAROM. The southern shed is a storehouse. TAROM has its own radio station in its traffic office building.
 7. Airfield headquarters is located in the north corner of the field. It is 30 by 15 meters in dimension, has two stories, and a flat roof with a five-meter high control tower. There are four hangars, two of which are 60 by 20 meters in dimension, with steel framework, brick walls, and corrugated metal sheet roofs. The other two hangars, 85 by 55 meters, are south of the other two, have concrete framework, flat concrete roofs, and sheet steel doors.
 8. The barracks unit is located 150 meters from the northwest corner and covers an area of 200 by 150 meters. It consists of four two-story and two one-story buildings, as well as garages and storerooms.
 9. The airfield is completely surrounded by barbed wire. The barracks unit is similarly fenced. There is no dispersal area.
 10. The radio station is in the headquarters building. The antenna erected on the flat roof is of the umbrella type, on a four-meter high metal pole. The diameter of the antenna is 2.5 meters. There is no radar station, but there are two mobile units on the airfield. There is said to be a radar station on the chain of hills west of the airfield. The screen there is reported to be eight meters long by three meters wide, and made of wire and metal plates. No details are available.
 11. The meteorological station in the airfield headquarters building has a windsock and tachometer on the flat roof of the building.
 12. The central fuel depot, 80 by 50 meters, is in the northern third of the west side of the field, surrounded by barbed wire. It has two underground tanks with a probable capacity of 10 carloads. There are three tank trucks on the airfield to service planes.
 13. The ammunition depot, 50 by 50 meters, is east of the east corner of the airfield and of the Topolnita River. It consists of three 8 by 10 meter underground storage tanks with concrete walls and wooden roofs, surrounded by barbed wire. No further details are available.
 14. There are concrete antiaircraft gun emplacements northeast of the north side; west of the center of the west side; and 250 meters northwest of the south corner of the airfield. Dirt gun emplacements are located 400

meters southwest of the north corner; 100 meters west of the west corner; and 100 meters south of the south corner of the airfield.

15. Four searchlights, reported to be 1,800 millimeters, are mounted on Mamm trucks. The mountain ranges on the west and northeast are lighted with neon lights. The line of the Danube River is marked by red neon lights, directed upwards to prevent flight deviations away from Rumanian territory.
16. A branch road, 360 meters northeast of the west corner of the airfield, leads to the field from the road between Turnu-Severin and Targu Jiu. The road has two branches, one to the civilian and one to the military part of the field. There is no branch railroad.
17. Electricity is supplied by the Turnu-Severin electric power plant. The overhead wire is on the west side of the road between Turnu-Severin and Targu Jiu. The branch to the field is west of the barracks unit.
18. The following is a legend for the attached sketch:
 1. Parking places for large (close-support) aircraft
 2. Parking places for fighters
 3. Relled temporary runway
 4. Completed section of the new concrete runway
 5. Part of the runway under construction
 6. Asphalted parking area
 7. Headquarters building
 8. Old hangars
 9. New hangars
 10. TAROM traffic office building
 11. Barracks unit
 12. TAROM garage
 13. Air police guardhouse
 14. TAROM storage house
 15. Concrete antiaircraft gun emplacements
 16. Dirt antiaircraft gun emplacements
 17. Electric power line
 18. Permanent radar station
 19. Central fuel depot
 20. Ammunition and bomb depot
